Address	Alti Solar
	Gasan-dong 481-11, Daeryung Technotown 8th No. 210
	153-775 Seoul
Country	South Korea

PRODUCTS OR MACHINERY

alti-solar®; focuses on providing industry's finest amorphous silicon thin-film modules offering economic, clean and renewable alternative to conventional electricity. We aim to contribute to your daily lives by reducing fossil fuel dependencies, CO2 emissions and providing long-lasting environmental friendly manufactured solar modules. Headquartered in Seoul, Korea, alti-solar's 50MW production complex lies in southern Korea encompassing over 300 employees. Production capacity is to be expanded to 150MW by 2011 with future lineup to include tandem and triple junctioned a-Si modules. Production facility is based on proven Ulvac manufacturing process with twenty percent of revenue to be reinvested in new technologies and further improving production efficiencies. alti-solar's a-Si solar modules generally provides more kilowatt hours in real outdoor conditions with its greater resistance to losses caused by ambient temperature, sunlight intensity and mid-day shadowing. Furthermore, a-Si module's reduced supply chain process compared to crystalline silicon manufacturing offers a stable and constant supply management.
