Address	Alumil Solar S.A 327, Tatoiou Avenue 13671 Aharnes ATHENS
Country	Greece

PRODUCTS OR MACHINERY

ALUMIL SOLAR provides certified aluminium PV mounting structures from high toughness aluminium alloy (Al 6005T6). These mounting structures are being produced in the company's high end technological facilities. ALUMIL is the leader in aluminium extrusion in Greece and SE Europe and one of the biggest in Europe, a characteristic that enables it to provide structure modules for photovoltaic (PV) farms of multi-MW per year. This competitive advantage ensures economies of scale and reduced costs for ALUMIL while maintaining high quality standards and a constant availability of spare parts. The structure design enables the mounting of all sizes of PV frames, a variety of patterns and all the PV technologies (crystalline silicon, thin film) optimizing the installation time. The company provides complete technical support for proper installation of the mounting structures in every PV farm. In addition, in order to achieve certification status by TÜV Hellas according to Eurocode 1 specifications, the design process followed the strictest parameters for permanent (self weight) loads, temperature changes, as well as snow and wind loads. Moreover, these dynamic loads were also calculated according to the designing spectrum of the 2000 Greek Antiseismic Regulation (EAK-2000) and the 2003 supplements. Finally, the parts' dimensioning was determined made according to Eurocode 9 specifications. ALUMIL SOLAR S.A.
