PRODUCTS OR MACHINERY

The Böcker AG is one of the leading manufacturers of crane and lift technology. Apart from our construction lifts, which have been enthusing roofers and other craftspeople for more than 50 years with up to 36 m lifting height, the Böcker customers are above all impressed by the truck and trailer cranes with up to 41 m lifting height and up to 6 t payload. Whether for the transport of roof tiles, bulk goods, solar modules or for the renovation of flat roofs, we provide you with a wide range of accessories to make our machines the best solution for any job „on the roof“. Apart from that the wide product range of Böcker includes various machines for almost any field of application. Our lifts have been popular as furniture lifts in the forwarding industry for decades. In the construction field we offer the complete range of transport solutions from simple construction winches up to large construction hoists and industrial lifts. The Böcker AG is one of the leading manufacturers as well in the field of bricklaying machinery and hydraulic clamps for bricks/concrete blocks, and our ALP personnel and material lifts are an ideal solution for particularly „narrow“ situations. Furthermore the Böcker AG constructs tailor-made lift solutions with the brand name Mobil-Lift for the subsequent installation in or next to existing buildings. We do not only sell all our machines but we also have a convenient rental service. The Böcker rental service has been a member company of the German System Lift AG network since 1997.
