## PRODUCTS OR MACHINERY

DDS-CAD can give you that competitive edge, by improving productivity, increasing accuracy and reducing risks. Produce construction documents directly from your design environment, and shorten design times with features that automatically generate these documents from the design model. Integrated calculations means that you can ensure that the design intent is reflected in the completed documentation; while sophisticated links with manufacturing, estimating and costing software streamlines the process of manufacture, project cost modelling and control. In short, it is the most complete solution available today.

DDS-CAD is a suite of complimentary solutions for the construction industry. Available separately or as a single integrated products, DDS-CAD is the most advanced suite of tools available on the market today.

Reduce coordination errors between electrical, HVAC, and plumbing engineering designers and with architects, structural engineers and others within a buildingSMART workflow. Minimise site information requests and expensive field design changes by working with more accurate construction documents. Collaborate using proven buildingSMART (IFC) technology.
