## PRODUCTS OR MACHINERY

oppelintegral develops and markets the integrated simulation environment INSEL. With INSEL any kind of model from the renewable energy technology sector, the meteorological field, building simulation and communication area can be created. INSEL contains large data bases for photovoltaic modules, inverters, solar thermal collectors and has an excellent weather data base with over 2000 locations worldwide. INSEL can be freely programmed and allows you to answer all simulation questions, not just from the renewable energy sector. Some customer designed products of the company doppelintegral have been created for easy design simulations of solar thermal cooling systems, photovoltaic power plants or inverter sizes. doppelintegral offers custom design solutions for all simulations and communication tasks.
