## PRODUCTS OR MACHINERY

HelioSphera (previously known as Next Solar) is a Greek company founded in 2007, with major shareholders headquartered in the United States of America. The company has already three operations in Europe: The headquarter and the factory in Greece (Athens and Tripolis, respectively) and a sales office in Madrid (Spain). The main activity of HelioSphera is the production of thin film photovoltaic panels, with an annual capacity of 60 megawatts. This high technology investment enjoys significant R&D potential in cooperation with the country's University Institutions and other European technology institutions. Micromorph modules by HelioSphera are manufactured according to the highest quality standards and deliver an outstanding performance even with low light situation, partial shading or higher temperatures. That means: above average energy yields and an increased return on investment
