Address	InReCon AG Von-Henle-Ring 44 93161 Sinzing
Country	Germany

PRODUCTS OR MACHINERY

InReCon and partners provides services and solutions to plan and build production systems in photovoltaics. We plan and deliver complete metrology tool packages (inline or offline) for your production lines. In addition we also provide analytical services to assure the quality of your consumables, wafers and photocells. We manage or coach your complex projects to integrate latest production equipment into your factory. This includes line and equipment planning, procurement, contract design, initiation and process optimization. We use special developed project management software tools, for example the "ePM-Guide". This intranet based guide includes the most important project business processes as well as interface and acceptance specifications for equipment, facilities and production processes. It also includes documentation templates for contracts, project reporting or protocols. We customize "ePM-Guide" to your specific requirements. We update the knowledge of your personnel. Our consulting and training services provide training courses and workshops in "Project Management" and "PV Production Process Ramp Up". We are ready to create or develop your individual training and project management guide. Our approach to delivering service combines the knowledge and experience of our people working side by side with companies to help them address their critical business issues and gain competitive advantage. We put this collective experience to work for you. According to our strictly customer oriented philosophy: "Your succes is our best product" Links to InReCon partner companies: www.InnovationEngineering.com www.sl-techlaw.de www.SemiSol.de
