PRODUCTS OR MACHINERY

KBB Kollektorbau GmbH was founded in 1993 in Berlin. We are a technology-oriented company specialising in the key components of thermal solar energy systems: absorbers, collectors and installation accessories. We distribute exclusively to OEM partners. KBB's goal is to help encourage the use of solar thermal energy by manufacturing high-quality yet affordable products. That's why we have been concentrating on the laser welding process since 2004, a process with which we have produced over 1,500,000?m² of solar absorbers. Thanks to our specialist knowledge and many years of experience we are able to supply premium solar products that meet market demands and that use automated production processes which conform to the highest industry standards.
