PRODUCTS OR MACHINERY

Offering top quality is one thing. Maintaining it is another! We care! Since 1975. A company doesn't get a successful 50-year track record for nothing. First and foremost it's down to our innovativeness – which pays tribute to our 30-plus years of experience as a pioneer in developing polycrystalline solar cells with peak efficiency levels. Add to that our exceptional quality standards, which we ensure by means of uninterrupted in-house manufacture and monitoring of our products that covers each and every component. And that is why our photovoltaic modules can survive even under the toughest general conditions – to which the KYOCERA plant at Jungfrauoch in Switzerland bears witness impressively.
