## PRODUCTS OR MACHINERY

Liujia Solar submersible pump is the only small economical solar powered pump in the world, which has been developed and produced in Germany and China since 1998. It is made of stainless steel and uses small solar panels, which thereafter produces high pressure and delivers a small amount of water. It is suitable for families and for small applications with the aim of saving water. After more than ten years of practical usage the pump proves to be a reliable, mobile and day- to day usage using renewable energy only. Liujia solar submersible pump can be extensive used in a sustainable way for improves the quality of people's live and work in lack of electric force area in both developed and developing country. In order to resolve the increasingly severe worldwide greenhouse effect, drought and water crisis, the solar submersible pump provides a powerful technical means and has a wide range of application possibilities. We warmly welcome distributors, who have the strength and commitment to environmental protection as well as project development companies to work with us in order to expand the future market of this innovative product.
