Address	<b>Morningstar Corporation</b> 8 Pheasant Run Newtown, PA 18940-1819
Country	USA

## PRODUCTS OR MACHINERY

Morningstar Corporation is a world-leading supplier of photovoltaic (PV) controllers and inverters using advanced technology. Our controllers and inverters have set new standards in the industry for quality, high reliability and extended battery life. At InterSolar, please inquire about our latest product, Morningstar's TriStar MPPT solar controller with TrakStar Technology. It is an advanced maximum power point tracking (MPPT) battery charger for off-grid photovoltaic (PV) systems. The controller features a smart tracking algorithm that maximizes the energy harvest from the PV by finding and maintaining operation at the solar array peak power point. The TriStar MPPT is well suited for large professional and consumer applications with PV systems up to 3kW. Its charging process has been optimized for long battery life and improved system performance. This product is fully adjustable and available in 45 or 60 amps and includes 90 days of data logging and several communication ports. Product options include the TriStar meter and remote meter as well as a remote temperature sensor. Morningstar is a privately owned US corporation. Our commercial office is located near Philadelphia, and our engineering lab is in Columbia, Maryland. Our products are manufactured in an ISO 9001 certified facility. Our Mission Morningstar's mission is to enhance our global market position as the market and technology leader in PV electronics. By employing the latest electronics technologies, we continually introduce innovative new products that are highly differentiated, yet priced competitively. We are responsive to the market by listening to our customers, and designing products with the right combination of quality, features, and cost. Our Products Morningstar's products have been recognized in the international PV markets as the most advanced and highest-quality products available as noted below: • Reliability: Exceeds all other PV controllers and inverters for protection against lightning surges and the harsh operating temperatures common to remote PV systems. • Battery Charging: Advanced PWM, constant voltage, pulsing charge algorithm results in an increase in battery capacity and operating life. • Value: Competitive in price with most controllers in the industry. Our low cost structure, coupled with advanced features and performance, make Morningstar's controllers the highest value products in the industry.
