PRODUCTS OR MACHINERY

Ontario has over 100 years experience with electric power generation, starting with the first turbines at Niagara Falls. Ontario is turning into a solar energy powerhouse, through brilliant science, an innovative environment, and a government committed to taking solar energy mainstream. The Green Energy Act will transform the market for solar energy, through the introduction of North America's most comprehensive feed-in tariff, and offer additional incentives to expand solar water & space heating.

Company Profile of **Ontario Ministry of International Trade & Investment**

A service of glasssglobal.com, an affiliate of glasssglobal group.
