Address	<b>Solar Integrated Technologies GmbH</b> Robert-Koch-Str. 50 55129 Mainz
Country	Germany

## PRODUCTS OR MACHINERY

Solar Integrated is a global solar solutions provider focusing on commercial buildings. We combine various technologies to develop the best technical and economically viable integrated photovoltaic system to meet every customer's specific needs. Founded in 2002 as a spin-off of one of the largest American roofing companies, we leverage over eighty years of proven construction and project management experience. Our company headquarters are located in Los Angeles, USA, and Mainz, Germany. Solar Integrated has developed a proprietary process to laminate thin-film, amorphous silicon photovoltaic elements to heavy-duty fabrics. The result is a fused fabric and solar panel product that is applicable to virtually any low-slope surface. The Solar Membrane roofing was specifically designed to meet both – energy and roofing needs. The newly introduced M-series is a further addition to the Solar Integrated Solar Roofing product portfolio. It is lightweight and has been designed specifically for easy and rapid installation directly onto metal roofs, carports on other structures. Solar Integrated's Follow the Sun™ system - a single axis tracking system - installed directly onto the roof or for use in Solar Parks. It incorporates a robust structural design and provides 18% up to 23% percent greater energy output compared to fixed systems.
