PRODUCTS OR MACHINERY

solar thermal, photovoltaics, solar parks, solar lamps

We offer multitude future- looking products and solutions for solar thermal and photovoltaic.

In the field of solar heating we have specialized in vacuum tube collectors. Compared to flat collectors they have a higher efficiency and up to 30% higher output.

In the area of photovoltaic we carry on both photovoltaic module and tracking systems (one axial and two axial). With systems like that photovoltaic modules are routed via electric actuator in the perfect temporally and seasonable position to the sun. Thus you can achieve the maximum electric yield.
