## PRODUCTS OR MACHINERY

Solior BV is a provider of sustainable, cost-effective and high-efficiency water heating solutions. The first series in our product portfolio are the FL150/SL150 and FL150t and SL150t solar water heaters. These solar water heaters integrate the solar collector and storage tank in one system and have internal mirrors to further improve its performance. This makes them easy to install, have low maintenance costs, and save valuable space in-house (compared to average solar water heaters). Solior is a first to combine contemporary design and optimal performance. Product environmental impact has been minimized by using recyclable materials.
