PRODUCTS OR MACHINERY

SUNOVA offers extensive flat-roof expertise combined with latest generation solar photovoltaic technology. This integrated approach forms the basis for a pan-European network of highly professional roof sealing specialists. SUNOVA's flat roof sealing systems have an extremely long service life, and are optimally compatible with our patented PV attachment solutions as well as with the innovative PV thinfilm technology. This in turn allows for the realization of large-scale, technically impeccable solar roofs using thin-film technology (glass/glass modules) or flexible photovoltaic roofing membranes. In our capacity as general contractor for such projects, we are able to provide single-source solutions that optimally marry flat roof to solar technology.

Company Profile of **SUNOVA AG**

A service of glasssglobal.com, an affiliate of glasssglobal group.
