PRODUCTS OR MACHINERY

Torpedo Specialty Wire, Inc is one of the world's premier producers of specialty high-performance composite conductors. For over 40 years, we have led the way in working with customers to develop new lead wire products, packaging, and processes used in diverse manufacturing applications. Since 1998, we produce PV Ribbon Wires for cell interconnect and buss wire tabbing for both silicon and thin film module manufactures. Copper flat wires are rolled from round wire and hot solder coated on all sides with customer specified leaded or lead free solder alloys. No edge burrs. No exposed copper edges. Custom packaging, special soft tempers, special solder coating alloys, and low thermal expansion materials are available by request. Please contact Torpedo Specialty Wire for your custom PV Ribbon needs.
