PRODUCTS OR MACHINERY

Xunlight Corporation is a manufacturer of high efficiency amorphous silicon (a-Si) solar modules using a roll to roll manufacturing process. Xunlight's triple junction thin-film amorphous silicon solar cell is deposited onto a stainless steel substrate, assembled with other cells to achieve desirable electrical characteristics and then encapsulated in a durable polymer material. It is lightweight, flexible and powerful. We've designed it to be easily installed either directly on the existing roof or integrated with the roofing membrane.
