Address	**Project Automation & Engineering GmbH** Im Hammereisen 42 47559 Kranenburg
Country	Germany

PRODUCTS OR MACHINERY

AUTOMATION – OPTIMIZATION – ENGINEERING - CONSTRUCTION – OVERHAUL

One doesn´t have to re-invent the wheel every day. And one doesn´t have to invent a new machine for every new production task, either.

Optimization instead of new development – often the best way.

Overhaul instead of new investment – often the more favourable way.

We offer you integrity and a solid foundation of expertise and experience in plant construction for the solution of your problems and challenges. Our talents can be put to your best use, wherever you need them. You can hire our services

- as an external development department
- as an adviser for modifications
- as your one-stop service company
- as experienced mechanical engineers
- as a competent partner in electrical engineering

We know about complex machine controls for packaging units and handling technology, for fully automatic portal cranes and product preparation machines, for example – or even laboratory automation using robots.
