Glass Wool – White, the new insulation product is introduced in the market.

Glass Wool – White is an environment-friendly product that prevents the possibility of formaldehyde emission at the very source of the problem by using acrylic resin instead of the existing phenol resin that is known to emit formaldehyde. In certified testing carried out after its development, absolutely no emission of formaldehyde (HCHO) was detected in this product. This insulation material has evolved from existing glass wool products in terms of heat resistance and other properties
