## PRODUCTS OR MACHINERY

China New Energy Chamber of Commerce (CNECC) is a non-profit organization committed to the development of the new energy industry. Our Chairman Huang Mengfu is also Vice Chairman of the Chinese People's Political Consultative Conference (CPPCC) National Committee, and our organisation has also obtained the official approval of the National Development and Reform Committee and National People's Congress. CNECC is the only organisation in the Chinese new energy industry which is able to actively participate in government and political affairs.

CNECC organises various events, including the annual New Energy Summit Forum in Beijing (now in its fourth year), and periodic salon events all over the country. We also organise industry visits for our members to key markets like Germany, Greece, Japan, Spain and South Korea. We are currently setting up a Special Committee on Thin Film, which will be of benefit to many of our member companies.
