## PRODUCTS OR MACHINERY

With a global push for renewable energy sources, photovoltaic (PV) technologies are growing at a rapid rate. Swagelok supports the industry in its pursuit of grid parity with fluid system products and services designed for the supply side. From springless diaphragm valves to bellows valves, and check valves to tube fittings, Swagelok provides leak-tight solutions for this growing industry.

Introducing the new Swagelok Specification SC-06:

- The first PV-specific guideline for stainless steel components.
- Provides fluid system components with a purity level that meets – but does not unduly exceed – your process requirements.
- Helps reduce the cost of producing solar cells.
- Now available for a wide variety of Swagelok products.
