PRODUCTS OR MACHINERY

Heavy Load Handlers for the transport of Glass Stillages weighing up to 45 tonnes.

Elof Heavy Load Handlers are used in numerous applications. Some of our standard machines can be configured below. Should you require engineering support with other applications or specifications feel free to contact Elof or your local Elof representative.

COMPANY BACKGROUND / HISTORY

ELOF specialises in the design and manufacture of indoor vehicles for the safe and efficient transport and handling of heavy loads, including Glass Stillages.

ELOF's patented 'low lift' technology does not use a counterweight. The compact size and low unladen weight of this unique design allows access to the tightest spaces, minimises machine and floor wear, and keeps power requirements low. Electrically driven, the machine is emission free.

Handlers for the transport of heavy Glass Stillages on the production floor include models for maximum loads of 20, 35 and 45 tonnes. Both sitting and standing driver seating options are available.

Company Profile of **Elof, Inc.**
