Address	CNPV Solar Power SA Victory industry Park, Dongying City Shandong Province 257000
Country	China (People's Republic)

PRODUCTS OR MACHINERY

Product Overview

We are one of the few PV manufacturers that have developed a vertically integrated business model from the production of crystalline ingots, wafers and cells to the assembly of high quality modules. We deliver high-quality and cost-effective products to our on-grid and off-grid commercial, industrial, institutional, residential and utility scale customers all over the world.

We design, develop, manufacture and commercialize solar modules. Solar modules are arrays of interconnected solar cells encased in a weatherproof frame. We produce standard solar monocrystalline and polycrystalline modules ranging from 10W to 300W in power output, built to general specifications for use in a wide range of residential, commercial, industrial and other solar power generation systems.

We assemble solar modules either from monocrystalline or polycrystalline cells. The variation in power output is based on the conversion efficiency of the cells used in our solar modules, as well as the types of cells. Our solar modules are sealed, weatherproof and able to withstand high levels of ultraviolet radiation and moisture.
