## PRODUCTS OR MACHINERY

PLS operates across many market sectors and supplies a wide range of products that are designed to maximise supply chain savings and synergies for our customers. PLS's core market sectors include Beverage, Retail, Food Manufacturers and Automotive with activities falling into five main categories. These are:

- Pallets
- Folding Containers
- Dollies and Display Pallets
- Top Frames and Lids
- Plastic Layer Pads

Unlike many traditional packaging rental companies all PLS's products are manufactured from heavy duty plastic, either HDPE or PP. This provides customers with many operational benefits such as increased product life, uniform size and reduced weight making them ideal for today's high speed automated production lines and store replenishment systems.

## COMPANY BACKGROUND / HISTORY

Since our launch in 2000, PLS has grown to become a leading European provider of returnable transit packaging solutions by consistently delivering great service and added value solutions that add real value to our customers supply chains.

Operating from a network of sites across Europe, we can provide a fully outsourced returnable packaging solution based around high quality equipment designed to optimise today's fast moving supply chains and automated production lines. Our dedicated team works across a wide range of sectors including food manufacture, beverage, automotive and retail. PLS is also the only supplier that can provide fully integrated solutions including outbound product logistics, packaging equipment and added value services such as asset management, repair, sorting and pallet, crate and layer pad washing. Additionally, we can integrate our services with those of our sister company TM Logistics to give customers a full supply chain solution.

All operations are ISO accredited and PLS utilises industry leading track and trace management systems incorporating bar code and RFID technology to maximise the control and utilisation of pooled equipment.
