PRODUCTS OR MACHINERY

Glass veil is a non-woven material composed of uniformly distributed glass fibers bound by organic additives. In addition to traditional urea and melamine based binders, our research and development department continuously test new binder formulas to provide innovative solutions, i.e. soft touch glass veil for mineral wool surfacing, formaldehyde free glass veil for indoor air quality, binder based on renewable resources, etc.

Because it does not rot and thanks to its performances in terms of dimensional stability and fire resistance, glass veil is the preferred material for the reinforcement of waterproofing membranes, surface mineral wool insulation products, etc.

Company Profile of **Saint-Gobain ADFORS Cz, Plant**

A service of glasssglobal.com, an affiliate of glasssglobal group.
