PRODUCTS OR MACHINERY

Novgorod Glass Fiber Plant specializes in production of glass and basalt fiber of high quality and materials on its basis. The most common usage of our products is heat-insulation and manufacturing of glass (or basalt) reinforced plastics. Comparative technical characteristics of fibers made of basalt, glass (E-glass) and silica.

Basalt fiber is an environmentally safe product. It's non-toxic, completely inert and has no environmental restrictions. Basalt fiber resist UV-light and biological and fungal contamination. Basalt doesn't become radioactive after irradiation. These properties make basalt fiber an effective material for ship building applications, taking into account increasing standards in this industry
