PRODUCTS OR MACHINERY

The Power of 1000 Suns

Semprius is developing concentrator photovoltaic (CPV) modules for large-scale solar power generation. Semprius' proprietary micro-transfer printing technology enables CPV modules constructed from a large array of very small gallium arsenide-based, multi-junction solar cells. Module cost is minimized by using high concentration ratio. Inexpensive optics concentrate 1,000 suns onto the high-efficiency solar cells, which only cover 0.1% of the module area.

Company Profile of **Semprius, Inc.**

A service of glasssglobal.com, an affiliate of glasssglobal group.
