## PRODUCTS OR MACHINERY

Solar heating and cooling is on its way to becoming a mature, widely accepted technology. It will become a mainstream energy source across the world and play an important role in climate protection and the reduction of emissions. We believe that the provision of accurate, timely and independent market information is an important contribution to the realisation of such targets.

With the international study ISOL Navigator solrico offers a compass through the global solar heating and cooling sector. The study was launched at the Intersolar Europe at the beginning of June in Munich, Germany.
