Country	Hungary

PRODUCTS OR MACHINERY

Our company is one of the leading companies in the field of control engineering since 1992. Our main activities are:

- Control engineering
- Electrical engineering
- Mechanical and combustion engineering
- Instrumental and electrical installation
- Maintenance

Primarily we deal with instrumental settings and automation of industrial kilns and their related technologies. Beside this we are well prepared to solve any other control engineering issue. We can provide complete combustion systems with controlling system as well. Furthermore we are well up in industrial information technology so we welcome to develop data collector and production tracking tools. Since industrial and building automation are closely related we are familiar with the second one as well. We are ready for programming and configuring combustion system of buildings.

We are presented in the most metallurgic and glass-works. Great majority of our contracting parties are multinational companies for whom quality and promptness are really important. We accomplish the orders through deliberate, accurate and effective planning and professional implementation. Our customers can count upon us in aftercare as well thanks to our well trained maintenance team.

All of our employees are acclaimed specialists who have the required qualifications and skills. Among our 12 engineers we have forge, electrical, mechanical and computer engineer.

We have more than 20 employees for maintenance and implementation. Most of them are controlling operator, electrical technician and electrician. In our maintenance team everyone is qualified for maintaining industrial gas and oil combustion systems.
