PRODUCTS OR MACHINERY

Supply of recyclable waste is coordinated by Bürck group directly.

We treat the waste glass using highly sophisticated sorting and grading lines. These deselect impurities such as metals, ferrous and non-ferrous, organic waste and odd colours.

The glass waste runs various process steps until the final product grade has been achieved. Our quality-manager takes probes and checks the output and characteristics on hourly basis. The recycled material will be re-used by glass makers to save valuable resources and energies.

Distribution of the recycled glass will again be coordinated by Bürck group directly. Our longterm cooperation and experience gathered, we have optimized our production processes constantly.
