PRODUCTS OR MACHINERY

WSA and SNOX™ - desulfurization and nitrogen removal

The development of the Topsoe WSA process for removal of sulfur compounds from flue gases and production of sulfuric acid began in the late 70s. The WSA process builds on Topsoe's extensive experience from the sulfuric acid business and on long-term commitment to development of catalysts and process technology. Major research areas are SO₂ oxidation over sulfuric acid catalysts and acid condensation.

Company Profile of **Haldor Topsoe**

A service of glasssglobal.com, an affiliate of glasssglobal group.
