## PRODUCTS OR MACHINERY

1. LED Glass defect inspection
2. Glass Inspection LED Point Light
3. LED Replaces Xenon Arc Lamps

The WattWorks L-140WX LED PointLight concept uses the brightest single-chip High Power LED available and proprietary optics to maximize luminous flux in the inspection area. In order to increase brightness while maintaining single-point-source image sharpness, the LED PointLight uses a proprietary spherical reflecting collar so the light escapes from the aperture in the recycling collar and increases brightness in the angular distribution defined by the aperture.

### Company Profile of **WattWorks Inc**

A service of glasssglobal.com, an affiliate of glasssglobal group.
