## PRODUCTS OR MACHINERY

Due to the modular design, all printers are available either for use with UV-curable inks or the use of ceramic glass inks.

The same applies to the material supply. This can be done both manually and by conveyor belt (conveyor belt) automatically.

For UV glass inks can be used on a manual application of the Pyrosil or in the printers with automatic feeding on an inline application. Here are some model names. More information on [www.longier-international.com](http://www.longier-international.com):

FG6090  
FG6000  
FG2850  
FG2000  
FG1450  
FG3750  
FG4480 / 9150/9850

Depending on the field of application and selected inks, printheads from Ricoh (Gen5) KonicaMinolta (KM1024) or Dimatix (SG1024MC) are used. Two sets of lines guarantee the same production performance when using white.

### Company Profile of **Longier Digital Technologies**

A service of [glasssglobal.com](http://glasssglobal.com), an affiliate of glasssglobal group.
