PRODUCTS OR MACHINERY

We have over 80 years of experience as a leading company in the manufacture and installation of heat-resistant concrete for kilns, boilers, and transportation elements for any industry requiring coatings designed to withstand high temperatures and physical-chemical attacks.

We have developed our own patented system, **ALFRANJET**, generally called **SHOTCRETING**, which involves 100% wet-mix pumping and high-speed spraying of heat-resistant concrete with and without aluminous cement, and without dust or waste. We have a long list of international references from multinational clients.
