Address	Crystal Units Limited 100 West Hendon Broadway NW9 7AA London
Country	United Kingdom

PRODUCTS OR MACHINERY

The company primarily manufactures insulating glass elements. In recent years the company has moved in a new direction. They now also offer heated glass, bonding, lamination etc. Crystal Units can also carry out work such as silicone bonding or toggle systems.

A special highlight in the product portfolio of the English glass processor is CUIN (= ultra-thermally efficient insulating glass). In this product, two panes are used instead of three for triple glazing and a film is placed in the middle where the third pane would be placed. This leads to higher energy efficiency and lower U-values. As a result, CUIN is more environmentally friendly and performs better than conventional glazing.
