Address	FinnSonic Oy Parikankatu 8 15170 Lahti
Country	Finland

PRODUCTS OR MACHINERY

FinnSonic Oy develops and manufactures ultrasonic cleaning systems for demanding parts cleaning applications. The company's customers in the glass container and table ware industries benefit from FinnSonic's mould cleaning technology, which replaces the conventional mechanical mould cleaning. Cost savings can be achieved because

- Energy consumption compared to running a sand blaster is much lower
- Manual handling of heavy mould parts is widely eliminated leading to reduced labour cost and safer work environment
- More production cycles per mould as no abrasive media is used
- Quality of end product is improved with less rejects
- Savings in glass mass consumption as moulds remain in their original tolerances

FinnSonic provides full global service including test cleaning, equipment specification, process chemicals, installation and commissioning, remote support, and after sales service.

Company Profile of **FinnSonic** Oy

A service of glassglobal.com, an affiliate of glassglobal group.
