PRODUCTS OR MACHINERY

Framery One is the most recently launched acoustic pod combining 4G technology and a digital ecosystem with superior acoustics and Framery's distinguished design DNA. It is the world's first connected soundproof pod creating an entirely new product category for the industry. Framery One is designed for one person.

Framery O phone booth is a perfect solution to have your discussions in privacy without disturbing your colleagues. O is designed for one person. For noisy environments, it is also a great place to sink in to deep concentration in peace and quiet.

Framery Q meeting pod allows people to have 2-4 person meetings, brainstorming sessions and important one-on-one conversations.

Framery 2Q is designed for 4-6 people. It's the best place to co-create, brainstorm and have great meetings. Our superior sound insulation system ensures that your meetings won't disturb the office — and the office noise won't disturb you.

COMPANY BACKGROUND / HISTORY

Framery was established in Tampere, Finland in 2010. Back then there were around a hundred employees working in the same open office space, two of them, including our current CEO who was also one of Framery's founders, had enough of listening to their boss speaking constantly on his phone with a headset.

It was basically impossible to concentrate on anything. The two soon came up with a less than polite proposal, that the boss go elsewhere to make his calls. He was quick with a response: "Well, buy me a phone booth". The problem being that there wasn't one on the market so the only alternative was to make one. That day they gave up working for that software company and started to become experts on acoustics and, Framery was born.

Today Framery is the industry pioneer - and the world's leading manufacturer - of soundproof pods, booths, and privacy solutions for noisy offices and workspaces. All its products are proudly designed and produced at its Tampere headquarters.

Framery employs around 400 people in 15 countries and its end customers can be found in 89 different countries and across all inhabited continents.

Framery products solve noise and privacy issues in dozens of the world's leading brands, including Tesla, Microsoft, SAP, Deloitte and Puma. In fact, around 40% of all 'Forbes 100' companies use Framery products.
