PRODUCTS OR MACHINERY

Our company offers professional services of custom cutting of glass and mirrors. Cutting is only one service of ours. You can order from a list of services of glass and mirror processing: polishing, grinding, figure cut, and much more. Additional mirror and glass processing significantly lowers the residual product stress.

Thanks to it, mirrors and glass become more appealing visually and long-lived. The correct professional cutting is the prerequisite for the wholeness of products for the long term; it's necessary when producing trade and exposition equipment and when the glass with visible edges is used.
