COMPANY BACKGROUND / HISTORY

Specific attention has been given to the development of the complete burning system, which consists in original burners designed only for this purpose. These burners are studied, developed and produced completely in CAR-MET's factory in order to guarantee to the customers: - High performances - Economical operating-service - High combustion's results All machines are completely and directly studied, produced and assembled in CAR-MET's

factory. The customer has always the possibility to follow the production step-by-step before the delivery, and to take part to the cold pre-testing of the machine in our factory.
